CERTIFICATE

It is certified that the

- (1) Thesis entitled “**HISTOPATHOLOGY, BIOCHEMISTRY AND CONTROL OF FUNGAL DISEASES IN (*Trigonella foenum- graecum* L.) IN KOTA DISTRICT OF RAJASTHAN**” submitted by Upma Singh is an original piece of research work carried out by the candidate under my supervision.
- (2) Literary presentation is satisfactory and the thesis is in a form suitable for publication.
- (3) Work evinces the capacity of the candidate for critical examination and independent judgment.
- (4) Candidate has put in at least 200 days of attendance every year.

FEW WORDS OF GRATITUDE

While putting my emotions on paper, I find myself extremely short of words. If there had been no footsteps for me to follow, no inspiration for me to go and no blessing hand over me, this work and indeed my research period career would not have seen the light of the day.

Language becomes a poor medium of expression when it comes to pen down my deep sense of gratitude and admiration I possess for my esteemed teacher and honorable guide

Dr. Indu Rani Sharma

*Head, P.G. Department of Botany,
Govt. P.G. College, Kota
(Rajasthan)*

For her inspiring supervision, constructive criticism and constant encouragement, without which the present work, would never have seen the light of the day.

I consider myself extremely fortunate to have worked under such a dynamic, scholastic and caring person.

Whatever is worth is all attributable to her, errors are mine.

Upma Singh

ACKNOWLEDGEMENTs

First of all with limitless humility, I would like to thank Almighty God who bestowed me with health and courage enough to go through this work.

With an overwhelming sense of pride and genuine obligations, it is my privilege to express my gratitude and profound personal regards to my esteemed guide Dr. Indu Rani Sharma, without whose constant help, deep interest and vigilant guidance the completion of this thesis was not possible. I consider a priceless gift in my way as a research Scholar and for that peculiar way of providing me the challenge to strive.

I am highly grateful to the Head, Department of Botany, Govt. College Kota for providing necessary facilities required for the study.

I am deeply indebted to all teachers of department for their generous help and inspiration, I also thank non teaching faculty of the department of Botany for their timely suggestion and cordial support.

I feel pleasure in conveying my sincere thanks to all the officials of Ummadganj (MPUAT).

It gives me immense pleasure to express my thanks to Dr. Naresh Nayak, Dr. Kiran Choudhary, Dr. Rohini Maheshwari, Geeta Karoliya for their suggestions encouragement, cooperation and moral support with great patience, every time, everywhere.

But for the affection, words of encouragement boundless love, unflagging inspiration, interest and selfless sacrifice of my Father Mr. DILIP SINGH, My mother Mrs. SHARDA, Father in Law Mr. OMKAR DAN CHARAN, Mother in

law Mrs. KAILASH KANWAR, My Brother Devvrat and Sister Tanushree and all other family members. Last but not the least are my better half OM PRAKASH SANDU and my little doll Divyanjal for their cooperation, Sacrifice, encouragement and inspiration during the entire period of studies and preparation of this manuscript.

DECLARATION

I hereby declare that the work incorporated in the present thesis entitled “**HISTOPATHOLOGY, BIOCHEMISTRY AND CONTROL OF FUNGAL DISEASES IN (*Trigonella foenum - graecum* L.) IN KOTA DISTRICT OF RAJASTHAN**” is my own work and is original. This work (in part or in full) has not been submitted to any University for the award of a degree or a diploma.

(Upma Singh)

LIST OF TABLES

TABLE NO.	TITLE	FOLLOW PAGES
1	Common species of Trigonella genus	3
2	Occurrence of Phytoparasitic fungi on fenugreek, in different localities of Kota district, Rajasthan	22
3	Incidence, Severity and Prevalence of Fungal Diseases of Fenugreek in different Tehsils of Kota district, Rajasthan	24
4	Disease incidence and losses due to leaf spot (<i>C. traversiana</i>) in Fenugreek crop at different localities of Kota district	25
5	Physiochemical Analysis of soil samples collected from fenugreek fields of 16 different sites of Kota district, Rajasthan.	41
6	List of weed species of 16 different study sites of Kota	50
7	Effect of <i>C. traversiana</i> on chlorophyll content of T. foenum graecum cultivar RMT-1 in mg/gm fresh weight	84
8	Quantification of various metabolites in healthy and <i>C. traversiana</i> infected leaves of T. foenum graecum cultivar RMT-1 plant at different stages of growth	85
9	Effect of different plant extract on % inhibition of mycelial growth of <i>C. traversiana</i>	113
10	Effect of Bioagents on % inhibition of mycelial growth of <i>C. traversiana</i>	113
11	Effect of different plant extracts on various growth parameters of <i>C. traversiana</i> infected Fenugreek plants	114
12	Effect of Bioagents on various growth parameters of <i>C. traversiana</i> infected Fenugreek plants	114
13	Representation of screening for resistance of fenugreek genotypes	118

LIST OF FIGURES

TABLE NO.	TITLE	FOLLOW PAGES
1	Life cycle of powdery mildew pathogen of fenugreek plant	26
2	Life cycle of downy mildew pathogen of fenugreek plant	26
3	Life cycle of leaf blight pathogen of fenugreek plant	26
4	Comparison of CHLOROPHYLL a mg/g in Fenugreek Plant after <i>C. traversiana</i> Infection at different growth stages	84
5	Comparison of CHLOROPHYLL b mg/g in Fenugreek Plant after <i>C. traversiana</i> Infection at different growth stages	84
6	Comparison of TOTAL CHLOROPHYLL mg/g in Fenugreek Plant after <i>C. traversiana</i> Infection at different growth stages	84
7	Comparison of CARBOHYDRATE mg/g content in Fenugreek Plant after <i>C. traversiana</i> Infection at different growth stages	85
8	Comparison of AMINO ACID content mg/g in Fenugreek Plant after <i>C. traversiana</i> Infection at different growth stages	85
9	Comparison of PROTEIN content mg/g in Fenugreek Plant after <i>C. traversiana</i> Infection at different growth stages	85
10	Comparison of PROLINE content mg/g in Fenugreek Plant after <i>C. traversiana</i> Infection at different growth stages	85
11	Comparison of PHENOL content mg/g in Fenugreek Plant after <i>C. traversiana</i> Infection at different growth stages	85
12	Comparision of different botanicals on % inhibition mycelial growth of <i>C.traversiana</i> in culture experiment	115
13	Comparision of different bioagent on % inhibition mycelial growth of <i>C.traversiana</i> in culture experiment	115
14	Comparison of different plant extracts on shoot length in Fenugreek plant	115
15	Comparison of different plant extracts on root length in Fenugreek plant	115
16	Comparison of different plant extracts on fresh weight in Fenugreek plant.	115
17	Comparison of different plant extracts on dry weight in Fenugreek plant	115
18	Comparison of different plant extracts on leaf area in Fenugreek plant	116
19	Comparison of different plant extracts on seed weight in Fenugreek plant	116
20	Comparison of different plant extracts on percent disease incidence in Fenugreek plant	116
21	Comparison of Bioagents on shoot length in Fenugreek plant	116
22	Comparison of Bioagents on root length in Fenugreek plant	116
23	Comparison of Bioagents on fresh weiht in Fenugreek plant	116
24	Comparison of Bioagents on dry weight in Fenugreek plant	116
25	Comparison of Bioagents on leaf area in Fenugreek plant	117

26	Comparison of Bioagents on seed weight in Fenugreek plant	117
27	Comparison of Bioagents on percent disease incidence in Fenugreek plant	117
